2. Duplicates of all drawings, site plans, and other required documents.
3. Application and Field inspection fees according to the most recent schedule
4. Street map indicating project location

TERMS OF THE PERMIT

Applying for a permit issued through the Pelican River Watershed District (PRWD) in no way precludes obligation for permit application that may be required through OTHER governmental agencies. Any work performed prior to obtaining all required authorizations may be subject to Federal, State and/or administrative, civil, and/or criminal penalties. No liability shall be imposed on the District or any of its officers, agents or employees on official or personal grounds, on account of the granting of this permit, on account of any damage to any person or property resulting from any act or omission of the Permittee or any of its agents, employees or contractors relating to any matter hereunder. This permit shall not be construed as limiting any legal claim or right of action of the District against the Permittee, its agents, employees or contractors for the violation of, or failure to comply, with the provisions of the permit or applicable provisions of law.

When all items have been satisfactorily completed and the District determines the project meets the District’s Rule requirement, this permit will be issued. The permit may be picked up at the District office, or it will be mailed to the designated address. A copy of the approved permit will be faxed to the applicable local governmental entity (Becker or Ottertail County, City of Detroit Lakes Zoning departments).

The permit will be valid for eighteen (18) months from the date of issuance, unless otherwise suspended or revoked. A permit may be extended at no charge, provided the property owner notifies the District in writing stating the reasons for extension. Any plan changes, and related project documents must also be included in the extension application. The District must receive the extension application at least thirty (30) day prior to the permit’s expiration date as issued.

If changes are made to the permitted plans for this project, changes must be submitted to the District (in duplicate form) for review prior to installation or completion occurs. If changes to the original (permitted) plans are approved, an amended permit will then be issued.

This permit may be terminated by the Board of Managers without notice at any time deemed necessary for the management of the water resources of the District, or in the interest of public health and welfare, or for violation of any of the provision of this permit.

PERMIT APPLICATION AGREEMENT

“I understand that, as a Permittee, I am legally accountable to ensure compliance with the terms and conditions of the permit. I understand that I am not authorized to begin the project until I received the permit and the permit is posted as directed on the project site. If the project is modified, I will obtain approval by the District before I continue with the project. I authorize the District, and its agents, employees, officers, and contractors to enter the project site to perform any inspection or work authorized by the permit or any applicable law.”

“I certify that I have thoroughly read and understand the information on this permit application, including submittal requirements.”

Landowner: Wade and Judi Johnson
Contractor: Josh Miller, Miller Construction
Project Address: 26319 Paradise Point Rd
PIN: 081205000
Site Visit Date: 07/15/2016
Parties Present During visit: Judi Johnson

I visited the above location to observe a steep slope in which the owner had applied for a permit to construct a stairway and install rip-rap along the shoreline.

The stairway had already been completed to the specification that were depicted in the application and meeting PRWD rules. A permit had been applied for and approved from Becker County prior to construction. Disturbed areas on the slope had already been seeded with erosion control matting installed on top. A landing was built at the bottom of the stairs which is allowed by PRWD Rules and County Ordinance. Some shoreline erosion was observed. Rip-rap will be installed along 25 feet of shoreline where the erosion is prominent. All vegetation along the shoreline and in the Shore Impact Zone will be preserved.

The permit is approved with the following conditions

1) Erosion and Sediment Control Best Management Practices will be installed to contain disturbed soils which will not be stabilized within 24 hours.
2) Rip-Rap installation will follow MN DNR guidelines.
3) Stairway will be built as shown in permit application sketch, dated 07/11/2016
4) Rip-rap will be installed as depicted in PRWD sketch, dated 07/20/2016
