2. Duplicates of all drawings, site plans, and other required documents.
3. Application and Field inspection fees according to the most recent schedule
4. Street map indicating project location

TERMS OF THE PERMIT

Applying for a permit issued through the Pelican River Watershed District (PRWD) in no way precludes obligation for permit application that may be required through OTHER governmental agencies. Any work performed prior to obtaining all required authorizations may be subject to Federal, State and/or administrative, civil, and/or criminal penalties. No liability shall be imposed on the District or any of its officers, agents or employees on official or personal grounds, on account of the granting of this permit, on account of any damage to any person or property resulting from any act or omission of the Permittee or any of its agents, employees or contractors relating to any matter hereunder. This permit shall not be construed as limiting any legal claim or right of action of the District against the Permittee, its agents, employees or contractors for the violation of, or failure to comply, with the provisions of the permit or applicable provisions of law.

When all items have been satisfactorily completed and the District determines the project meets the District’s Rule requirement, this permit will be issued. The permit may be picked up at the District office, or it will be mailed to the designated address. A copy of the approved permit will be faxed to the applicable local governmental entity (Becker or Ottertail County, City of Detroit Lakes Zoning departments).

The permit will be valid for eighteen (18) months from the date of issuance, unless otherwise suspended or revoked. A permit may be extended at no charge, provided the property owner notifies the District in writing stating the reasons for extension. Any plan changes, and related project documents must also be included in the extension application. The District must receive the extension application at least thirty (30) day prior to the permit’s expiration date as issued.

If changes are made to the permitted plans for this project, changes must be submitted to the District (in duplicate form) for review prior to installation or completion occurs. If changes to the original (permitted) plans are approved, an amended permit will then be issued.

This permit may be terminated by the Board of Managers without notice at any time deemed necessary for the management of the water resources of the District, or in the interest of public health and welfare, or for violation of any of the provision of this permit.

PERMIT APPLICATION AGREEMENT

"I understand that, as a Permittee, I am legally accountable to ensure compliance with the terms and conditions of the permit. I understand that I am not authorized to begin the project until I received the permit and the permit is posted as directed on the project site. If the project is modified, I will obtain approval by the District before I continue with the project. I authorize the District, and its agents, employees, officers, and contractors to enter the project site to perform any inspection or work authorized by the permit or any applicable law."

"I certify that I have thoroughly read and understand the information on this permit application, including submittal requirements."

ACTION BY THE PELICAN RIVER WATERSHED DISTRICT

The above application is APPROVED, DISAPPROVED this 4th day of September, 2015, by the Pelican River Watershed District

By: ___________________________

Its: Administrator
Landowner: Scott Wolff  
Contractor: Natures Design  
Project Address: 916 Longview Drive  
Site Visit Date: 08/10/15  
Parties Present During visit: Josh Braten (Natures Design)

I met with the contractor to discuss installing rain gardens on a steep slope, sand blanket installation, tilling/seeding within the Shore Impact Zone, and rip-rap installation on Long Lake.

The following will be done as discussed and shown on the submitted designs.

1. Installation of rip-rap will be done along the length of the property with a non-woven geotextile filter fabric backing.
2. 12’x12’ sand beach blanket will be installed. The sand will not exceed 6 inches in depth with no fabric underlayment.
3. Two rain garden/planting areas will be constructed on the steep slope area. Rocks used will not exceed 18 inches and coconut fiber matting will be used for slope stabilization.
4. Back dirt fill will be brought in, tilled, and seeded to establish permanent vegetation (grass) near the lake.

The following conditions are to be met by the permit holder.

1. Installation will follow the submitted designs and drawings.
2. Erosion control will be installed and maintained until permanent vegetation is established.
3. Fill material moved and/or brought into the Shore Impact Zone will be less than 10 cubic yards.
4. Contractor will contact the Pelican River Watershed District after rocks are placed for rain garden to verify location.

Brent Alcott | Assistant Administrator
This is for Flower bed 1 and 2. We will put rock in front and then Core Log behind to help with water runoff. Coconut matting coming from bottom up between rock and core log. Mulch and plants will be planted as well.
