I met with the homeowners of 1576 W Lake Drive to discuss repairing damaged rip-rap along the shoreline.

Previous year ice damage caused slumping of the shoreline and exposed areas that were previously covered with rip-rap. The homeowners will be repairing damage using existing rock were possible. Non-woven, geotextile fabric will be installed between rock and any organic soils. The toe of the rip-rap will be extended to obtain a 3:1 slope (or near to).
