PERMIT APPLICATION SUBMISSION CHECKLIST

☐ Completed permit application, signed by the **Property Owner**, or authorized signatory

☐ Duplicates of all drawings, site plans, erosion prevention and sediment control plan, maintenance plans, and other information as per the District Engineer Technical Memo dated July 14, 2016.

☐ Application and Field inspection fees according to the most recent schedule

☐ Project location map

TERMS OF THE PERMIT

Applying for a permit issued through the Pelican River Watershed District (PRWD) in no way precludes obligation for permit application that may be required through OTHER governmental agencies. Any work performed prior to obtaining all required authorizations may be subject to Federal, State and/or administrative, civil, and/or criminal penalties. No liability shall be imposed on the District or any of its officers, agents or employees on official or personal grounds, on account of the granting of this permit, on account of any damage to any person or property resulting from any act or omission of the Permittee or any of its agents, employees or contractors relating to any matter hereunder. This permit shall not be construed as limiting any legal claim or right of action of the District against the Permittee, its agents, employees or contractors for the violation of, or failure to comply, with the provisions of the permit or applicable provisions of law.

When all items have been satisfactorily completed and the District determines the project meets the District’s Rule requirement, this permit will be issued. The permit may be picked up at the District office, or it will be mailed to the designated address. A copy of the approved permit will be sent to the applicable local governmental entity (Becker or Ottertail County, City of Detroit Lakes Zoning departments).

The permit will be valid for eighteen (18) months from the date of issuance, unless otherwise suspended or revoked. A permit may be extended at no charge, provided the property owner notifies the District in writing stating the reasons for extension. Any plan changes, and related project documents must also be included in the extension application. The District must receive the extension application at least thirty (30) day prior to the permit’s expiration date as issued.

If changes are made to the permitted plans for this project, changes must be submitted to the District (in duplicate form) for review prior to installation or completion occurs. If changes to the original (permitted) plans are approved, an amended permit will then be issued.

This permit may be terminated by the Board of Managers without notice at any time deemed necessary for the management of the water resources of the District, or in the interest of public health and welfare, or for violation of any of the provision of this permit.

A **permit surety** may be required of the permit holder or applicant. A surety is a monetary sum (an amount set by the Board of Managers, District staff and/or the District engineer after review of the project application or approved permit) provided by the applicant/permittee to the District to ensure the project is completed as designed and in compliance with District Rules. The District returns the money to the applicant/permittee after all permit conditions are met and the project is complete. If the District requires a surety, the applicant/permittee must provide the District the surety amount in the form of a check made out to the Pelican River Watershed District, or a Performance Bond, or Letter of Credit.

PERMIT APPLICATION AGREEMENT

“I understand that, as a Permittee, I am legally accountable to ensure compliance with the terms and conditions of the permit. I understand that I am not authorized to begin the project until I received the permit and the permit is posted as directed on the project site. If the project is modified, I will obtain approval by the District before I continue with the project. I authorize the District, and its agents, employees, officers, and contractors to enter the project site to perform any inspection or work authorized by the permit or any applicable law.”

“I certify that I have thoroughly read and understand the information on this permit application, including submittal requirements.”

ACTION BY THE PELICAN RIVER WATERSHED DISTRICT

The above application is **APPROVED** / **DISAPPROVED** this [Date] day of [Month], 20[Year] by the Pelican River Watershed District

By: [Signature]

Its: Administrator
Landowner: Hellekson
Contractor: N/A
Project Address: 22233 Peterson Ln   PIN: 171049107
Site Visit Date: 4/14/17
Parties Present During visit: None

I visited the site on Pearl Lake at the request of Becker County Zoning. The owner had come to them to inquire on what can be done on an eroding shoreline.

There no erosion along the water’s edge. Additional rip-rap is not needed.

The property contains 150ft of shoreline. There is 50ft of shoreline in which the woody vegetation preciously removed, which is also the area where erosion is present and where the shoreline improvements are proposed.

The application states that the owner will add some fill and even out a 24ft section of shoreline sloping toward the lake to correct the erosion. Shrubs will be planted on both side of the slope repair. The slope will be re-vegetated with native grasses.

Erosion control will be installed to contain all disturbed soils. Straw wattles will be placed at the uphill and downhill portions of the disturbed area. The area will then be re-seeded with native grasses and covered with coconut matting for erosion control.

The permit will be issued with the following conditions

1) Project will be constructed as shown on approved site plan, prepared by the owner, not dated.

2) Project will be constructed as shown on PRWD photograph, dated 04/14/2017

3) Erosion and Sediment Control Best Management Practices will be installed as shown on PRWD photograph, dated 04/14/2017.

4) Beach Sand addition must be clean, washed sand, not to exceed 25’ x 10'

5) All measures must conform to other applicable Zoning and Shoreland Ordinance regulations (Becker County, City of Detroit Lakes, Minnesota Pollution Control Agency, MN Department of Natural Resources)

Brent Alcott | Assistant Administrator
- Repair slope to match grade
- Restore to native plant物种
- Mulch this area
- Build stone streambed
